

Hello Everyone !

I am Tejshri M. Gavhane one of the student of Bharati Vidyapeeth's college of Engineering Lavale, Pune. I did my Engineering in mechanical engineering department. When I entered into the department I have got many practical things to learn.

As department has well established labs, experienced faculties, various co-curricular and extra co-curricular activities, Industrial visits, Industrial expert lectures, Internship Assistance. As we know there is need of to feel gap between practical things and theoretical things, our department always provide such programme to encourage the students.

The internship cell provide various industries for internship to maximum students and also arrange industrial expert lectures which gives actual scenario of industries.

I did my internship in Mechatol solutions regarding design of various mechanical system. Which gives us knowledge about optimum design, selection of materials, design calculations.

Such internship programme builds lots of confidence in every students to get placed individually.

Now, I am working in a Astron valvetech Pvt. Ltd. Which is a core mechanical company. I am working as a quality engineer trainee. This is possible due support of our department and all the faculties who always provide proper guidance about such activities.

I would like to thank our principle sir Dr R. N. Patil , HOD of Mechanical Engineering Department Prof. S. R. Patil sir and all the faculties who always guide me whenever I required.

Thank you so much.!

My name is Sumit Kumar. I am a student of Bharati Vidyapeeth's College of Engineering Lavale Pune completing my Engineering in the field of Computer Science.

Internships are very important for each and every student as it gives exposure to them in corporate world. It also make them independent and their ability to think out of the box also improves.

I really want to thank to Internship Cell of my college to provide me the opportunity to work with big tech companies like *JP Morgan, Deloitte, Microsoft* in their project.

Our Internship Cell not only provide me opportunity for Internship but also helps me in getting Scholarship from *Google, Microsoft, Amazon, Facebook, Intel and Nutanix* in the field of Machine Learning, Artificial Intelligence, Android and Cloud Computing which are highly demand technologies.

It have really helped me to understand the working environment and help me to improve my personality and attitude towards life.

Thank you so much for these opportunities

Hi, my name is SAHIL PATEL currently studying in BE Mechanical Engineering so I did my internship at MERCEDES BENZ and it was my best days of working at a such a great company. So basically, I was a project intern at the Quality department and was work was basically to unpack the seats of cars which used to be shipped from USA and CHINA. Make check list and send it to the respective countries that shipped the seats. Every day we used to have meetings about the previous day, what work was completed by each employee, any problems faced the blue people, solving the problems is any, and giving presentation to the all the GM's.

I would like to thank my college to grant me 2 months of time to experience the industry work and work under such a great company.

The internship cell is doing an amazing job in providing the students the right platform to experience the actual work that is needed in the industry currently. Lastly I would like to say that internship should be done by each and every student so that he/she gets to know the real work done in the industry..

.

Hello Everyone !

Myself Kajal Paliwal. I completed my internship at Soiltech India Pvt.Ltd. Interning at Soiltech has imparted me with cross-cultural skills and qualities, providing me with greater knowledge and understanding of corporate world. I established newfound confidence in myself and my abilities strengthening my career development.

MR. SANSKAR MASKE
-ACES Core-Committee,
- IEEE Chairperson (Student's Council),
- NDLI Club student's In-charge

I would like to thank Bharati Vidyapeeth's College of Engineering Lavale's teaching staff as well as PRINCIPAL, HOD and the INTERNSHIP CELL to encourage me for doing an internship and giving me information about some platform. Result of which I got very first internship in 3rd semester and that was in InternShala where I worked as a technical and marketing intern. My second internship was in BOLT IOT where I worked as a Marketing and Business analytic as well as run a product campaign with outstanding response. Recently I did my job in HSPM Solutions LLP. as Head of Marketing and Business development as well as hiring-person for social media marketing intern for the company and managed a team of interns. Also, I got selected for Anchor CSR internship. Lastly, I would like to thank INTERNSHIP CELL for encouraging and making me a very confident personality to cope up with every challenges with positivity.

MS. MADHURA NAIK
-ACES Core-Committee,

I did an internship with InternShala for a month in my second year. This internship was mainly about promoting InternShala and it's courses within my college campus and friends. I was called the **Campus Manager**. I had to share some links, talk to my friends about various InternShala trainings and their benefits. I learnt about digital marketing and how to do it. This internship was a great experience as it helped me enhance my communication and other skills. I'm grateful to all The professors and our HOD as well as PRINCIPAL who constantly keep students motivated to grab opportunities and give our best, and special thanks to THE INTERNSHIP CELL who helped and gave me a chance to get well experienced In industrial work.
