Role of Bacteria for the Recovery of Precious Metals from E-waste

[Dipika Jaspal](#) , [Smita Jadhav](#) & [Prashant Mahajan](#)

Chapter | [First Online: 02 March 2023](#)

214 Accesses | **1** Citations

Abstract

Electronic waste (e-waste) is the fast-growing waste produced all over the world, which is estimated to be 20–50 million tons. Printed circuit boards (PCBs) and other electronic equipments are the major contributors to e-waste encompassing a higher concentration of precious metallic elements like copper (Cu), silver (Ag), and gold (Au) as well as it contains hazardous and toxic materials. To avoid the dangerous effect of these substances on living beings and the environment, various methods have been

applied, particularly the use of bacteria to recover metals from e-waste, as a sustainable approach toward the environment. The current chapter focuses on precious metals leaching from PCBs (e-waste) by various bacteria reflecting a feasible and alternative technique to the existing conventional methods for e-waste recycling. In the recovery of precious metals, various researchers have mentioned the vital role played by pH. A massive portion of the valuable metals is estimated to exist in e-waste. Generally, one metric ton of e-waste consists of 160–210 kg of Cu and 80–1500 g Au which is much higher related to that existing in its ore. Bacterial remediation is environmentally feasible, energy-efficient, cost-effective, and reduces secondary pollution. Bacterial leaching exhibits a potential industrial applicability in reclaiming e-waste.

DOI: <https://doi.org/10.52305/PJPJ7248>

Activated Charcoal has proved to be one of the most promising environmentally sustainable material for air, water, and soil remediation. Recently, activated charcoal has also been explored for its use in several other domains including its medicinal benefits. Its superior performance as an adsorbent for controlling contamination and recovery of important resources has led to the augmentation of its applications across industries around the world. Activated charcoal is used in water treatment plants for the exclusion of organic compounds, color, odour, synthetic chemical compounds and antibiotics from wastewater. It proves to be a futuristic substance in terms of health, resources, economy and environmental sustainability.

along with the available patent studies and research analysis on the material. This book predominantly proposes activated charcoal as a solution to the environmental challenges encountered around the world. This work will help readers understand, appreciate and recognize the wide spectrum utilization of activated charcoal in today's context. The content of this book will facilitate the development of innovative strategies and future research directions to attain sustainability, with the use of this material. The book will be beneficial to scientists, engineers, chemists and researchers in the academic and industrial fields.

Gaussian Filter-Based Speech Segmentation Algorithm for Gujarati Language

[Priyanka Vishwas Gujarathi](#) & [Sandip Raosaheb Patil](#)

Conference paper | [First Online: 14 July 2021](#)

503 Accesses

Part of the [Smart Innovation, Systems and Technologies](#) book series (SIST, volume 224)

Abstract

Automatic speech segmentation is a main step in speech signal production and analysis process. Great advancement in speech synthesis has already been made using concatenative algorithms. Syllable is most suitable speech unit for concatenative speech synthesis because it does not require extensive prosodic models and provide better co-articulations

than other sound units. To get natural sounding, output speech segmentation plays very important role. Speech segmentation is the process of dividing speech signal in to smaller units of sound. So accurate selection of speech unit and detection of boundaries are very important. In this research work, Gujarati language is used for segmentation and database is created. This paper suggests a method of syllable segmentation to detect boundaries of syllable by means of start point of syllable and end point of syllable. Performance parameters such as accuracy and peak signal to noise ratio (PSNR) are evaluated. Producing natural sounding speech signal in different Indian languages is a very demanding and ongoing problem.

Comprehensive Review on Machine Learning for Plant Disease Identification and Classification with Image Processing

[Shital Jadhav](#) & [Bindu Garg](#)

Conference paper | [First Online: 24 January 2022](#)

373 Accesses | **2** Citations

Part of the [Algorithms for Intelligent Systems](#) book series (AIS)

Abstract

Machine learning techniques are used for crop disease identification and classification. Considering the remote nature of Agriculture, an optimized model needs to be discovered. Traditional handcrafted features lack accuracy compared to the latest

Convolutional Neural Network (CNN) models.

Automatic feature extraction and classification is the latest research arena. To deal with the challenges of extracting leaves from the real field images needs to be addressed by an efficient segmentation technique.

This paper evaluates popular segmentation techniques with pros and cons. Computation power and accuracy for image classification are evaluated on various parameters. This work reviews and analyzes various approaches used by researchers to solve plant disease diagnosis challenges. After review, it is identified to develop small, fast and accurate models based on Support Vector Machines and compact neural networks like MobileNet for mobile devices. Identifying parameter and hyper-parameters for developing lightweight models evaluated based on present research and future directions for research identified.

A Session Key Based Security Mechanism for Cyber Physical System

Authors [Sandip Thite, J. Naveenkumar](#)
 Pages 245 - 250
 DOI 10.3233/APC210201
 Category Research Article
 Series [Advances in Parallel Computing](#)
 Ebook [Volume 39: Recent Trends in Intensive Computing](#)

Abstract

In recent years extensive research is going on for the development of applications which convert physical devices into smart devices. Industry 4.0 adopt the technologies under Cyber Physical Systems (CPS) for the development of such types of smart devices. Increase in the use of such type of smart devices without any security mechanism causes an open invitation for cyber attackers to perform cyber-attacks on such devices. Even current security algorithms are not efficiently work due to some constraints of smart devices. The goal of this research paper is to provide effective solution against different cyber-attacks on CPS applications. This paper proposed session key-based security mechanism which is used for the prevention of cyber-attacks and authentication of cyber devices.

1332 Accesses | **3** Citations

Part of the [Lecture Notes on Data Engineering and Communications Technologies](#) book series (LNDECT, volume 46)

Abstract

Greenhouse is provide controlled area environment to grow plants. Growth of the plant always affected by key environmental parameters such as temperature, humidity, light intensity, moisture etc. In the present system, environmental parameters in a greenhouse are monitored and controlled. Sensors

are used for data acquisition and are interfaced with microcontroller unit. Android application is developed to display environmental parameters. To control temperature fan is used. To control humidity fogger is used. To control soil moisture water pump is used. To control light intensity artificial light source is used. Wifi module is interfaced with MCU.

Greenhouse parameters can be monitored & controlled using IoT.

Robust Speaker Recognition Based on Low-Level- and Prosodic-Level-Features

[S. M. Jagdale](#) , [A. A. Shinde](#) & [J. S. Chitode](#)

Conference paper | [First Online: 03 December 2019](#)

556 Accesses | **3** Citations

Part of the [Lecture Notes in Electrical Engineering](#) book series (LNEE, volume 612)

Abstract

Speaker recognition is an important task in security applications where a person is recognized through speech input. In speaker recognition, a person is recognized from his or her voice. As no two individuals have same voice and also they have different speaking style, rhythm, tone, etc., speaker is recognized by extracting low-level spectral features

and high-level behavioural features. This paper presents a robust speaker recognition approach which combines spectral features and prosodic features to improve the performance. The robust recognition system has been tested under different SNR levels. Two subsystems are implemented (i) speaker recognition based on low-level features such as Mel-frequency cepstral coefficient (MFCC) features. (ii) combined system with MFCC and prosodic features. These subsystems are able to achieve competitive results in classifying different speakers. Experimental results are done on interactive emotional dyadic motion capture database (IEMOCAP). The fusion of low-level and prosodic features achieve approximate 15–20% improvement in accuracy.

86 Accesses | **1** Citations

Part of the [Lecture Notes in Electrical Engineering](#) book series (LNEE, volume 601)

Abstract

Extensive research efforts are going on to contribute to the Internet of Things (IoT) application development. IoT will create network of “Things” capable of communicating and sharing information with one another. The main goal of IoT is to make the physical environment more intelligent. IoT plays an important role in smart cities and smart homes. The

goals of this research paper are six-fold: (i) serve as a guideline for researchers who are new to the Internet of Things (IoT) and want to contribute to this research area, (ii) analyze problems and challenges identified in the implementation of middleware for IoT, (iii) provides a brief overview of the sensor network in Internet of Things (IoT) for building smart cities, (iv) depicts challenges on technologies and applications from India's perspective, (v) proposes a general IoT architecture to meet the architecture challenge, and (vi) provides further research directions required into the Internet of Things (IoT) middleware and software architectures.

The Potent Combo of Software Testing and NLP

[Nilofar Mulla](#) & [Naveenkumar Jayakumar](#)

Conference paper | [First Online: 19 May 2020](#)

107 Accesses | **1** Citations

Part of the [Lecture Notes in Electrical Engineering](#) book series (LNEE, volume 601)

Abstract

In the case of the agile software development environment, the key challenge is to generate test cases applying user stories. The newly designed “User story Processor (USP) algorithm” can be used to pre-process the user stories using Natural Language Processing (NLP). This Paper also presents the clear flow for execution for future development. This is ongoing research and as the future scope for real-

time run, plug-in with other testing software will be very efficient. Such plug-in can be deployed for agile software tools as an added functionality as each agile project can contain different modules of the project which need multiple types of testing.

Index

- ◇ List of Standard Formulae for Mathematics F-1 to F-4
- ◇ Chapter 1 : Ordinary Differential Equations of First Order and First Degree 1-1 to 1-84
- ◇ Chapter 2 : Applications of Differential Equations 2-1 to 2-66
- ◇ Chapter 3 : Reduction Formulae 3-1 to 3-60
- ◇ Chapter 4 : Beta and Gamma Function 4-1 to 4-50
- ◇ Chapter 5 : Differentiation Under Integral Sign (DUIS) and Error Function 5-1 to 5-28
- ◇ Chapter 6 : Curve Tracing and Rectification of Curves 6-1 to 6-76
- ◇ Chapter 7 : Solid Geometry - Sphere 7-1 to 7-46
- ◇ Chapter 8 : Cone and Cylinder 8-1 to 8-44
- ◇ Chapter 9 : Multiple Integrals and their Application 9-1 to 9-64
- ◇ Chapter 10 : Applications of Multiple Integrals 10-1 to 10-72
- ▶ Fully solved Model Question Paper for In Sem and End Sem Exam Q-1 to Q-3

[BTCOC402] (FID : BATU24) (Book Code : BATUE6A)

Table of Contents

UNIT I

Chapter 1 : Probability Theory	1-1 to 1-33
1.1 Introduction.....	1-1
1.2 Theory of Probability	1-1
✓ Syllabus Topic : Definition of Probability : Classical	1-3
1.2.1 Mathematical (Or Classical) Definition of Probability	1-3
✓ Syllabus Topic : Definition of Probability : Empirical.....	1-3
1.2.2 Statistical (Or Empirical) Definition of Probability.....	1-3
✓ Syllabus Topic : Definition of Probability Axiomatic Approach of Probability	1-5
1.2.3 Axioms.....	1-5
✓ Syllabus Topic : Properties of Probabilities with Proofs.....	1-5
1.3 Properties of Probabilities with Proofs	1-5
1.3.1 Probability of the Impossible Event is Zero, i.e., $P(\phi) = 0$	1-5
1.3.2 Probability of the Complementary Event \bar{A} is given by, $P(\bar{A}) = 1 - P(A)$	1-5
1.3.3 For any Two Events A and B, $P(\bar{A} \cap B) = P(B) - P(A \cap B)$	1-6
1.3.4 If $B \subset A$, Then (i) $P(A \cap \bar{B}) = P(A) - P(B)$ (ii) $P(B) \leq P(A)$	1-6
1.3.5 $P(A \cap B) \leq P(A)$ and $P(A \cap B) \leq P(B)$	1-6
1.4 Addition Theorem of Probabilities (Theorem of Total Probability).....	1-6

1.4.1 If A, B and C are any Three Events, Then $P(A \cup B \cup C) = P(A) + P(B) + P(C) - P(A \cap B) - P(B \cap C) - P(C \cap A) + P(A \cap B \cap C)$	1-7
1.4.2 If A_1, A_2, \dots, A_n are n Mutually Exclusive Events, then the Probability of the Happening of One of them is $P(A_1 \cup A_2 \cup \dots \cup A_n) = P(A_1 + A_2 + \dots + A_n) = P(A_1) + P(A_2) + \dots + P(A_n)$	1-7
1.5 Conditional Probability.....	1-10
✓ Syllabus Topic : Multiplication Theorem on Probability.....	1-10
1.5.1 Multiplication Theorem on Probability.....	1-10
1.5.2 Multiplication Theorem for Independent Events	1-11
✓ Syllabus Topic : Baye's Theorem of Inverse Probability ..	1-20
1.6 Revising Prior Estimates of Probabilities.....	1-20
1.6.1 Baye's Theorem (Statement):.....	1-20
1.7 Miscellaneous Examples	1-23

→ **Multiple Choice Questions**

UNIT II

Chapter 2 : Random Variable and Mathematical Expectation	2-1 to 2-24
2.1 Introduction.....	2-1
✓ Syllabus Topic : Random Variables	2-1
2.2 Random Variables	2-1
2.2.1 Types of Random Variables	2-2
✓ Syllabus Topic : Probability Distributions	2-3
2.3 Probability Distribution of a Random Variable	2-3
✓ Syllabus Topic : Probability Mass Function	2-3
2.4 Probability Mass Function.....	2-3

2.5 Probability Density Function..... 2-4

2.5.1 Properties of a Distribution Function..... 2-4

2.5.2 Properties of Probability Density Function 2-4

✓ Syllabus Topic : Mathematical Expectations 2-8

2.6 Mathematical Expectation 2-8

✓ Syllabus Topic : Joint Probability Distributions 2-9

2.7 Joint Probability Distribution..... 2-9

2.7.1 Properties of Joint Probability Distribution
Function :..... 2-10

2.7.2 Joint Probability Density Function of A
Two-Dimensional Random Variables :..... 2-10

2.7.3 Properties of Joint Probability Density Function..... 2-10

✓ Syllabus Topic : Marginal Probability Distribution..... 2-10

2.8 Marginal Probability Distribution Function..... 2-10

✓ Syllabus Topic : Properties of Expectations and
Variance with Proof 2-17

2.9 Properties of Expectation and Variance..... 2-17

→ Multiple Choice Questions

UNIT III

Chapter 3 : Probability Distribution 3-1 to 3-38

✓ Syllabus Topic : Binomial Distribution..... 3-1

3.1 Binomial Distribution..... 3-1

3.1.1 Examples on Binomial Distribution:..... 3-2

✓ Syllabus Topic : Poisson Distribution..... 3-8

3.2 Poisson's Distribution..... 3-8

3.2.1 Mean of Poisson's Distribution..... 3-8

3.2.2 Variance of Poisson's Distribution..... 3-8

3.2.3 Standard Deviation of Poisson's Distribution 3-9

3.2.4 Examples on Poisson's Distribution 3-9

✓ Syllabus Topic : Normal Distribution 3-18

3.3 Normal Distribution 3-18

3.3.1 Standard Form of the Normal Distribution 3-19

3.3.2 Steps to find Probability with different z 3-19

3.3.1 Examples on Normal Distribution 3-20

✓ Syllabus Topic : Fitting of binomial Distribution..... 3-25

3.4 Fitting of Binomial Distribution 3-25

✓ Syllabus Topic : Properties of Binomial Distribution..... 3-27

3.5 Properties of Binomial Distribution 3-27

3.5.1 Applications of Binomial Distribution : 3-28

✓ Syllabus Topic : Properties of Poisson Distribution 3-28

3.6 Properties of Poisson Distribution 3-28

✓ Syllabus Topic : Properties of normal Distribution 3-29

3.7 Properties of normal Distribution 3-29

✓ Syllabus Topic : Relation between Binomial and Normal
Distribution 3-31

3.8 Relation between Binomial and Normal Distribution 3-31

✓ Syllabus Topic : Relation between Poisson and Normal
Distribution 3-31

3.9 Relation between Poisson and Normal Distribution 3-31

✓ Syllabus Topic : Importance of Normal Distribution 3-31

3.10 Importance of Normal distribution..... 3-31

→ Multiple Choice Questions

UNIT IV

Chapter 4 : Correlation 4-1 to 4-21

4.1 Introduction 4-1

4.1.1 Measures of Central Tendency 4-1

4.1.2 Arithmetic Mean (or Simply) Mean 4-1

4.1.3 Effect of Change the Origin and Scale 4-2

4.1.4 Dispersion 4-2

4.1.5 Standard Deviation (S.D) 4-2

4.1.6 Coefficient of Variation 4-3

✓ Syllabus Topic : Correlation and Causation..... 4-3

4.2 Correlation and Causation : 4-3

✓ Syllabus Topic : Types of Correlation 4-4

4.3 Types of Correlation..... 4-4

4.3.1 Covariance 4-4

4.3.1.1 Properties of Covariance..... 4-5

✓ Syllabus Topic : Methods of Studying Correlation 4-5

4.4 Methods of Studying Correlation : 4-5

4.4.1 Scatter Diagram Method : 4-5

✓ Syllabus Topic : Karl Pearson's Correlation Co-efficient 4-6

4.5 Karl-Pearson's Correlation 4-6

✓ Syllabus Topic : Properties of Karl Pearson's Correlation Coefficient 4-7

4.6 Properties of Karl Pearson's Correlation Coefficient..... 4-7

4.6.1 Working Rule for Finding Correlation Coefficient..... 4-7

✓ Syllabus Topic : Spearman's Rank Correlation Coefficient..... 4-13

4.7 Spearman's Rank Correlation Co-efficient..... 4-13

✓ Syllabus Topic : Properties of Spearman's Rank Correlation Co-efficient..... 14

4.8 Properties of Spearman's Rank Correlation Co-efficient 4-14

4.8.1 Working Rule to Solve the Problems on Spearman's Rank Correlation Co-efficient..... 4-14

✓ Syllabus Topic : Probable Errors 4-17

4.9 Probable Error of Karl Person's Coefficient of Correlation : 4-17

→ Multiple Choice Questions

UNIT V

Chapter 5 : Linear Regression Analysis 5-1 to 5-19

✓ Syllabus Topic : Introduction 5-1

5.1 Introduction 5-1

✓ Syllabus Topic : Linear Regression and Non- Linear Regression..... 5-1

5.2 Linear Regression..... 5-1

✓ Syllabus Topic : Lines Of Regression 5-1

5.3 Lines of Regression 5-1

✓ Syllabus Topic : Derivation of Lines of Regression of Y on X 5-2

5.3.1 Derivation of Lines of Regression of Y on X..... 5-2

✓ Syllabus Topic : Derivation of Lines of Regression of X on Y 5-3

5.3.2 Derivation of Lines of Regression of X on Y..... 5-3

✓ Syllabus Topic : Angle between the Regression Lines 5-5

5.4 Angle Between The Regression Lines 5-5

✓ Syllabus Topic : Co-efficient of Regression 5-5

5.5 Co-efficient of Regression 5-5

✓ Syllabus Topic : Theorems on Co-efficient of Regression..... 5-5

5.6 Theorems on Co-efficient of Regression..... 5-5

✓ Syllabus Topic : Properties of Regression Co-efficient..... 5-6

5.7 Properties of Regression Co-efficient..... 5-6

5.7.1 Working Rule to find Lines of Regression 5-6

→ Multiple Choice Questions

UNIT VI

Chapter 6 : Applied Statistics	6-1 to 6-28
6.1 Introduction.....	6-1
6.1.1 General Rules (Laws) Reducible to Linear form (Straight Line).....	6-1
6.1.2 Fitting a Straight Line by Graphical Method.....	6-2
✓ Syllabus Topic : Curve Fitting by the Method of Least Square.....	6-3
6.2 Curve Fitting by the Method of Least Square.....	6-3
6.2.1 Principle of Least Squares.....	6-3
✓ Syllabus Topic : Fitting of Straight Line by the Method of Least Squares.....	6-4
6.3 Fitting of Straight Line by the Method of Least Squares.....	6-4
6.3.1 There are different Methods for Finding the Constants m and c.....	6-4

✓ Syllabus Topic : Fitting of Second degree parabolas by the Method of Least Squares.....	6-9
6.4 Fitting of Parabola by the Method of Least Square.....	6-9
✓ Syllabus Topic : Fitting More General Curves by the Method of Least Squares.....	6-13
6.5 Fitting of Other Curves (Or Fitting Exponential Curve).....	6-13
6.6 Testing of Hypothesis.....	6-15
✓ Syllabus Topic : Tests of Significance.....	6-16
6.7 Tests of Significance.....	6-16
✓ Syllabus Topic : Large Sample Test for Single Proportion, Difference of Proportion, Single Mean, Difference of Means and Difference of Standard Deviations.....	6-16
6.7.1 Tests of Significance For Large Samples.....	6-16

**UNIT I**

Chapter 1 : Matrices		1-1 to 1-47
1.1	Introduction	1-1
1.2	Definition of a Matrix	1-1
1.3	Types of Matrices	1-1
1.3.1	Row matrix or Row Vector	1-1
1.3.2	Column Matrix or Column Vector	1-2
1.3.3	Rectangular Matrix	1-2
1.3.4	Square Matrix	1-2
1.3.5	Diagonal Matrix	1-2
1.3.6	Trace of Matrix	1-2
1.3.7	Determinant of the Matrix	1-2
1.3.8	Singular Matrix and Non Singular Matrix	1-2
1.3.9	Null Matrix or Zero Matrix	1-3
1.3.10	Unit (Identity) Matrix	1-3
1.3.11	Scalar Matrix	1-3
1.3.12	Transpose of a Matrix	1-3
1.3.13	Upper Triangular Matrix	1-3
1.3.14	Lower Triangular Matrix	1-3
1.3.15	Triangular Matrix	1-3
1.3.16	Conjugate of a Matrix	1-3
1.3.17	Transposed Conjugate of a Matrix	1-4
1.3.18	Symmetric Matrix	1-4
1.3.19	Skew-Symmetric Matrix	1-4
1.3.20	Hermitian Matrix	1-5
1.3.21	Skew – Hermitian	1-5
1.4	Operations of Matrices	1-5
1.4.1	Equality of Two Matrices	1-5
1.4.2	Addition of Matrices	1-5
1.4.3	Subtraction of Matrices	1-5
1.4.4	Scalar Multiplication	1-6
1.4.5	Multiplication of Matrices OR Product of Two Matrices	1-6
1.4.6	Power of Matrix	1-6
✓	Syllabus Topic : Properties of Matrices	1-6
1.5	Properties of Matrices	1-6
✓	Syllabus Topic : Inverse of Matrix	1-9
1.6	Inverse of A Matrix	1-9
1.6.1	Minor of an Element of Determinant	1-9
1.6.2	Cofactor of an Element	1-9
1.6.3	Adjoint of a Matrix	1-9
1.7	Orthogonal Transformation	1-11
1.8	Unitary Matrix	1-12
✓	Syllabus Topic : Elementary Transformation	1-13
1.9	Elementary Transformations	1-13
1.9.1	Equivalent Matrix	1-13
1.10	Elementary Matrices	1-13

✓	Syllabus Topic : Rank of Matrix	1-14
1.11	Rank of Matrix	1-14
✓	Syllabus Topic : Echelon or Normal Matrix	1-14
1.12	Echelon form of Matrix	1-14
1.13	Normal Form or First Canonical Form of a Matrix	1-15
1.13.1	Definition	1-15
1.13.2	Steps to Find Normal Form of a Matrix	1-15
1.14	Reduction of a Matrix A to Normal form PAQ	1-19
✓	Syllabus Topic : Linear Equation	1-24
1.15	Linear Equations	1-24
1.16	Homogeneous Linear Equations	1-31
✓	Syllabus Topic : Linear Dependence and Linear Independence of vectors	1-38
1.17	Vectors	1-38
✓	Syllabus Topic : Characteristic Values and Characteristic Vectors	1-43
1.18	Eigen values and Eigen Vectors	1-43
✓	Syllabus Topic : Cayley - Hamilton Theorem	1-45
1.19	Cayley - Hamilton Theorem	1-45
✓	Syllabus Topic : Reduction of Matrix to a Diagonal Matrix	1-46
1.20	Reduction of Matrix to a Diagonal Matrix	1-46
✓	Syllabus Topic : Similarity of Matrices	1-47
1.21	Similarity of Matrices	1-47

UNIT I

Chapter 2 : Complex Numbers		2-1 to 2-31
✓	Syllabus Topic : Complex Number	2-1
2.1	Standard Form of Complex Number	2-1
2.1.1	Conjugate of a Complex Number	2-2
2.1.2	Algebra of Complex Numbers	2-2
✓	Syllabus Topic : Equality of Complex Numbers	2-4
2.2	Equality of Complex Numbers	2-4
✓	Syllabus Topic : Graphical Representation of Complex Number (Argand's Diagram)	2-5
2.3	Graphical Representation of Complex Number (Argand's Diagram)	2-5
✓	Syllabus Topic : Mathematical Operation with Complex Numbers and their Representation on Argand's Diagram	2-5
2.3.1	Mathematical Operation with Complex Numbers and their Representation on Argand's Diagram	2-5
✓	Syllabus Topic : Polar Form of the Complex Number	2-6
2.4	Polar Form of the Complex Number	2-6
✓	Syllabus Topic : Polar Form of $x + iy$ for Different Sign of x, y	2-8
2.4.1	Polar Form of $x + iy$ for Different Signs of x, y	2-8
2.4.2	Multiplication of Complex Numbers in Polar Form	2-11
2.4.3	Division of Complex Numbers In Polar Form	2-11

✓	Syllabus Topic : Exponential Form of Complex Number.....	2-12
2.5	Exponential Form of the Complex Number.....	2-12
2.6	Complex Numbers as Vectors.....	2-12
2.7	De-Moivre's Theorem.....	2-14
2.7.1	De-Moivre's Theorem and its Corollaries.....	2-15
2.7.2	Expression of $\sin n\theta$, $\cos n\theta$ in Powers of $\sin \theta$, $\cos \theta$	2-20
2.7.3	Expansion of $\sin^n \theta$, $\cos^n \theta$ in Terms of sines and cosines of Multiples of θ	2-20
2.8	Roots of the Complex Numbers.....	2-21
✓	Syllabus Topic : Circular Functions of Complex Angles.....	2-23
2.9	Circular Functions of Complex Numbers.....	2-23
✓	Syllabus Topic : Definition of Hyperbolic Function.....	2-24
2.10	Hyperbolic Functions.....	2-24
✓	Syllabus Topic : Relation between Circular and Hyperbolic Function.....	2-24
2.10.1	Relation between Circular and Hyperbolic Functions.....	2-24
✓	Syllabus Topic : Differentiations and Integration.....	2-25
2.10.2	Differentiation and Integration of Hyperbolic Functions.....	2-25
✓	Syllabus Topic : Graphs of Hyperbolic Function.....	2-26
2.10.3	Graphs of Hyperbolic Functions.....	2-26
✓	Syllabus Topic : Inverse Hyperbolic Function.....	2-28
2.10.4	Inverse Hyperbolic Functions.....	2-28
✓	Syllabus Topic : Logarithms of complex quality, $j(=i)$ as an operator (Electrical Circuits).....	2-29
2.11	Logarithms of Complex Number.....	2-29

UNIT II

Chapter 3 : Equation of the First Order and of the First Degree 3-1 to 3-84

✓	Syllabus Topic : Introduction.....	3-1
3.1	Introduction.....	3-1
3.1.1	Notation.....	3-1
3.1.2	Prerequisite.....	3-1
3.2	Differential Equations.....	3-2
3.3	Ordinary Differential Equation.....	3-2
3.4	Partial Differential Equation.....	3-2
✓	Syllabus Topic : Order, Degree of Differential Equation.....	3-2
3.5	Order.....	3-2
3.6	Degree.....	3-2
3.7	Examples on Order and Degree of Differential Equations.....	3-3

✓	Syllabus Topic : Formation of Differential Equations.....	3-4
3.8	Formation of Ordinary Differential Equations.....	3-4
3.8.1	Steps to Form the Differential Equation from the General Solution of the Differential Equation.....	3-5
3.8.2	Examples of Formation of Ordinary Differential Equations.....	3-5
✓	Syllabus Topic : Solution of Differential Equation.....	3-12
3.9	Solution of Differential Equation.....	3-12
3.9.1	General Solution.....	3-12
3.9.2	Particular Solution.....	3-12
3.9.3	Ordinary Differential Equation of First Order First Degree.....	3-12
✓	Syllabus Topic : Variable Separable Form.....	3-13
3.10	Variable Separable Form.....	3-13
3.10.1	Examples on Variable Separable Form.....	3-13
3.10.2	Reducible to Variable Separable Form.....	3-20
✓	Syllabus Topic : Homogeneous Equation.....	3-25
3.11	Homogeneous Differential Equation.....	3-25
3.11.1	Examples on Homogeneous Differential Equation.....	3-25
✓	Syllabus Topic : Equation Reducible to Homogeneous Form.....	3-33
3.12	Linear Non-Homogeneous Differential Equation.....	3-33
3.12.1	Examples on Non-Homogeneous Differential Equation.....	3-34
✓	Syllabus Topic : Exact Differential Equation.....	3-40
3.13	Exact Differential Equation.....	3-40
3.13.1	Examples on Exact Differential Equations.....	3-41
✓	Syllabus Topic : Equations Reducible to Exact Equations Differential.....	3-49
3.14	Reducible to Exact Differential Equation.....	3-49
3.14.1	Integrating Factor (I.F.).....	3-49
3.14.2	Methods to Find Integrating Factor (I.F.).....	3-49
3.14.3	Working Rule to Solve Reducible to Exact Differential Equation.....	3-49
3.14.4	Examples on Reducible to Exact Differential Equation.....	3-50
✓	Syllabus Topic : Linear Differential Equation.....	3-60
3.15	Linear Differential Equation.....	3-60
3.15.1	Working Rule to Solve Linear Differential Equation.....	3-60
3.15.2	Examples on Linear Differential Equation.....	3-60
✓	Syllabus Topic : Bernoullie's Differential Equation.....	3-68
3.16	Reducible to Linear Differential Equation.....	3-68
3.16.1	Bernoullie's Differential Equation.....	3-68

3.16.2	Examples on Bernoulli's Differential Equation	3-68
3.16.3	Differentiation is of the form $f'(y) \frac{dy}{dx} + P(y) = Q$	3-74
3.17	Substitution Method	3-77
3.17.1	Examples on Substitution Method	3-78
3.17.2	Transform to Polar	3-79

UNIT II**Chapter 4 : Differential Equation of the First Order of a Degree Higher than the First 4-1 to 4-8**

✓	Syllabus Topic : Equations of the first Order and Higher Degree	4-1
4.1	Equations of the first Order and Higher Degree	4-1
4.2	Examples on First Order and Higher Degree	4-2
✓	Syllabus Topic : Clairaut's Equation	4-7
4.3	Clairaut's Equation	4-7

UNIT II**Chapter 5 : Linear Differential Equations with Constant Coefficients 5-1 to 5-28**

✓	Syllabus Topic : Introduction	5-1
5.1	Introduction	5-1
✓	Syllabus Topic : Differential Operator	5-2
5.2	The Differential Operator	5-2
5.2.1	Complete (General) Solution of the Differential Equation (D.E.)	5-2
✓	Syllabus Topic : Linear Differential Equation $f(D)y = 0, f(D)y = x$	5-2
5.3	Linear Differential Equation	5-2
5.3.1	Linear Differential Equations with Constant Coefficients	5-2
✓	Syllabus Topic : The Complimentary Function (C.F.)	5-4
5.4	Method to find Complimentary Function (C.F.)	5-4
✓	Syllabus Topic : The Inverse Operator and the Symbolic Expration for the a Particular Integral $1/f(D)X$	5-5
5.5	Methods to find Particular Integral (P.I.)	5-5
5.5.1	Particular Integral (P.I.)	5-5
✓	Syllabus Topic : General Method	5-5
5.5.2	General Method to find Particular Integral (P.I.)	5-5
✓	Syllabus Topic : Particular Integral : Short Methods	5-7
5.5.3	Short Methods to find P.I. (Particular Integral)	5-7
✓	Syllabus Topic : Particular Integral : Other Method	5-18
5.6	Method of variation of parameters	5-18

5.6.1	Method (A)	5-18
5.6.2	Method (B)	5-18
5.6.3	Solved Problems	5-19
5.7	Differential Equation of the Form $\frac{d^2y}{dx^2} = f(x)$	5-19
5.7.1	Differential Equation of the form $\frac{d^2x}{dt^2} = f(y)$	5-20
✓	Syllabus Topic : Differential Equations Reducible to the Linear Differential Equations with Constant Coefficients	5-21
5.8	Equations Reducible to Linear Differential Equations with Constant Coefficients	5-21
5.8.1	Cauchy's or Euler's Homogeneous Linear Differential Equations	5-21
5.8.2	Legendre's Linear Differential Equation	5-23
5.8.3	Simultaneous Linear Equations with Constant Coefficients	5-25

UNIT III**Chapter 6 : The Laplace Transform 6-1 to 6-17**

✓	Syllabus Topic : Introduction	6-1
6.1	Introduction	6-1
6.1.1	Prerequisite	6-1
✓	Syllabus Topic : Definition of the Laplace Transform	6-1
6.2	Definition of Laplace Transform	6-1
6.2.1	Existence Condition	6-2
✓	Syllabus Topic : Table of Elementary Laplace Transform	6-2
6.3	Laplace Transform of Standard Functions	6-2
✓	Syllabus Topic : Theorems on Important Properties of Laplace Transformation, First Shifting Theorem, Second Shifting Theorem, The Convolution Theorem	6-4
6.4	Properties of Laplace Transform	6-4
✓	Syllabus Topic : Laplace Transform of an Integral	6-14
6.5	Evaluation of Integrals by using Laplace Transform	6-14
✓	Syllabus Topic : Laplace Transform of Derivatives	6-15
6.6	Laplace Transform of derivatives	6-15
6.6.1	Laplace Transform of the Differential Equation	6-15

UNIT III**Chapter 7 : Inverse Laplace Transform 7-1 to 7-17**

7.1	Inverse Laplace Transforms	7-1
✓	Syllabus Topic : Shifting Theorem	7-1
7.2	Shifting Theorem	7-1

✓	Syllabus Topic : Partial Fraction Methods	7-4
7.3	Partial Fraction Methods	7-4
✓	Syllabus Topic : Use of Convolution Theorem	7-7
7.4	Convolution Theorem	7-7
✓	Syllabus Topic : Laplace Transform of Special Functions, Periodic Function, Heaviside Unit Step Function, Dirac – delta Function (Unit Impulse Function)	7-9
7.5	Laplace Transform of Special Functions	7-9
✓	Syllabus Topic : Solution of Ordinary Linear Differential Equation with Constant Coefficients, Solution of Simultaneous Ordinary Differential Equation	7-12
7.6	Solution to the Differential Equation using Laplace Transform Method.	7-12

UNIT IV

Chapter 8 : Multiple Integrals 8-1 to 8-22

8.1	Introduction.....	8-1
✓	Syllabus Topic : Double Integral	8-1
8.2	Definition.....	8-1
8.2.1	Solved Examples on Double Integrals	8-2
✓	Syllabus Topic : Change of the Order of Integration	8-3
8.3	Evaluation of Double Integral by Changing the Order of Integration	8-3
✓	Syllabus Topic : Double Integral in Polar Co-Ordinates	8-8
8.4	Double Integral in Polar Co-Ordinates	8-8
8.4.1	Evaluation of Double Integral	8-9
✓	Syllabus Topic : Triple Integrals	8-18
8.5	Triple Integrals.....	8-18
8.5.1	Solved Examples.....	8-18

UNIT IV

Chapter 9 : Applications of Integration 9-1 to 9-12

9.1	Introduction	9-1
✓	Syllabus Topic : Area	9-1
9.2	Area Enclosed by Plane Curves	9-1
9.2.1	Areas of Cartesian Curves.....	9-1
9.2.2	Areas of Polar Curves.....	9-2
✓	Syllabus Topic : Volume of Solids	9-10
9.3	Volumes of Solids	9-10

UNIT V

Chapter 10 : Beta and Gamma Functions 10-1 to 10-17

10.1	Introduction	10-1
✓	Syllabus Topic : Definition, Properties and Problems	10-1
10.2	Definition : Beta and Gamma Function.....	10-1
10.2.1	Gama Function	10-1
10.2.2	Beta Function.....	10-1
10.2.3	Properties of Beta and Gamma Functions.....	10-1
10.2.4	Solved Problems.....	10-4
✓	Syllabus Topic : Duplication Formula	10-16
10.3	Duplication Formula.....	10-16

UNIT V

Chapter 11 : Differentiation Under Integral Sign & Error Function 11-1 to 11-11

11.1	Introduction	11-1
✓	Syllabus Topic : Differentiation Under Integral Sign	11-1
11.2	Differentiation Under Integral Sign.....	11-1
11.2.1	Rule 1 : If Limits of Integrals are Constants	11-1
11.2.2	Rule II : If Limits of Integrals are Functions of Parameters	11-1
11.2.3	Examples on Rule 2	11-7
✓	Syllabus Topic : Error Function	11-8
11.3	Error Function	11-8
